ONLINE RESEARCH PROJECT

Refine your research skills, strengthen your academic writing, and explore the opportunity to publish in leading student journals through a focused 10-hour research programme.

With one-to-one mentoring from advanced researchers at institutions like Oxford, Cambridge, UCL, and Imperial, students gain a real edge for top university applications.

- Fee £2500 (25% discount bolt on)
- Suitable for students aged 13-18.
- Enrolment: Available year-round.
- 10 hours of one-on-one mentoring with an expert in the field.
- Classes focused on research techniques, document reviews, essay writing skills, and more.
- 1-2-1 Support Personalised one-on-one mentoring with an expert to guide you through your research journey.
- Skills: Research methodologies, academic writing, essay composition, document analysis, and independent research techniques.
- Unique Research Topic: Students will choose a unique research topic within their field of interest, guided by their expert supervisor.
- Publication Opportunities: Research projects can be submitted to relevant, student-friendly journals (e.g., Journal of Emerging Investigators, Young Scientists Journal, Psychology Review, STEM Fellowship Journal etc.)

MEDICINE..... Learn how to conduct medical research with 10 hours of one-to-one mentorship from an NHS doctor or academic. Explore a unique topic, build academic writing skills, and develop a research paper suitable for submission to journals like the Journal of Emerging Investigators.

PSYCHOLOGY..... Work one-to-one with a psychology expert to build research skills and produce a publication-ready paper. Includes 10 hours of mentorship plus classes on research methods and academic writing, with the chance to submit to journals like Psychology Review.

STEM..... Explore topics in biomedicine, chemistry, biology, or natural sciences with 10 hours of one-on-one mentoring. Includes classes on research techniques and academic writing, with the opportunity to submit to journals like Young Scientists Journal or Journal of Emerging Investigators.

ENGINEERING..... Work alongside industry professionals and academics to explore a topic of your choice. With 10 hours of one-on-one mentorship, you'll refine your research skills, develop your academic writing, and produce a paper ready for submission to journals like the Journal of Emerging Investigators.

ARCHITECTURE..... Perfect for aspiring architects, this programme combines architectural theory, design, and real-world issues. Through 10 hours of one-on-one mentoring, you'll develop a research project and strengthen your academic writing, with the option to submit your work to leading architecture journals.

COMPUTER SCIENCE..... Explore cutting-edge topics in computer science, from AI to cybersecurity, with expert one-on-one mentorship. Over 10 hours, you'll develop an original research project and refine your academic writing, with the opportunity to submit your work to journals like the STEM Fellowship Journal.

PROGRAMMING & AI..... Step into the world of AI and programming with 10 hours of personalised mentoring to develop your own research project. Explore cutting-edge topics and refine your coding and writing skills, with the opportunity to submit your work to relevant journals.

BUSINESS/ECONOMICS.. Develop your understanding of the business world with guidance from professionals in finance or economics. Through 10 hours of one-on-one mentoring, you'll explore a topic of your choice and produce a research paper suitable for submission to platforms like The Young Economist Journal.

HISTORY..... Immerse yourself in historical research by exploring a topic of your choice, guided by an expert mentor. Across 10 hours of one-on-one support, you'll develop a research paper suitable for submission to history-focused platforms.

LAW..... Engage in high-level legal research designed for future lawyers and policymakers. With 10 hours of one-on-one mentoring, you'll explore contemporary legal issues and develop the skills to produce a publication-ready paper for platforms like The Future Lawyer Blog.
